# WHY INVEST IN THE FIXED INCOME MARKETS?

**Fixed income investing remains at the heart of the overall allocation. The recent sharp rise in yields confirms its appeal.**

**Benefit, through a dynamically managed conviction-based allocation, from the many opportunities offered by the various fixed income segments.**

**The macroeconomic environment continues to favour a flexible approach to sensitivity with a view to fully benefiting from all opportunities.**

## WHAT INVESTMENT UNIVERSE?

The investment team implements different strategies for these asset classes. The fund therefore benefits from market segment diversification as well as strategy diversification in the following segments:

- ▶ Money market,
- ▶ Inflation-linked bonds,
- ▶ Government bonds,
- ▶ Investment grade credit<sup>3</sup>,
- ▶ High Yield Credit\*,
- ▶ Emerging market bonds,
- ▶ Convertible bonds,
- ▶ Financial debts.

## WHAT INVESTMENT STRATEGY?

The strategy benefits from the synergy between the following three performance drivers: a diversified allocation, the management of interest rate sensitivity and the selection of securities delegated to experts. The strategy is governed by strict limits and is managed as a risk budget at the level of each segment and at the overall portfolio level. A particular focus is also placed on liquidity risk.

<b>SENSITIVITY</b>	Dynamic management between -2 and +8
<b>EXCHANGE-RATE RISK</b>	Foreign exchange risk is systematically hedged
<b>HIGH YIELD* AND EMERGING MARKET DEBT</b>	50% maximum
<b>EXPOSURE TO EQUITIES</b>	10% maximum via Convertible Bonds
<b>RISK MONITORING</b>	The portfolio's overall exposure is controlled in real time through a approach centred on VaR

\* High Yield: bonds issued by companies that have a higher default risk than investment grade bonds and offer a higher coupon in exchange.

3. Investment Grade: bonds rated as "high quality" by rating agencies.
